## English Translations of the Bible & Parts Thereof on DVDs & CDs

### Short title Sorted by Date

**Note:** For the exact title page data, look in my Bible bibliography's index for the translator's/editor's name for the page number. The strange spelling is directly from the actual title page, thus not an error. Although there could be some typos. Title page only is the Google short title only - no text available.

When you see several dates listed below an entry (indented), this indicates the dates of complete copies of different editions downloaded for that entry. If there are several with the same dates or volumes listed its because there are duplicate copies available for that entry. All dates are to be assumed to be one volume unless otherwise noted. If only one or several volumes were located and downloaded, it so states.

Since experience has shown that many scanned books are not without error (80% of those on Google have some errors on them, i.e. text off pages, blurry, a few missing pages, etc. The other sites only have a error rate of about 5%), it was decided upon to download the same books from different sources if available.
